4. GENERAL RULES:

CANCELLATION -

If insurance is cancelled or reduced at the request of the company or the insured, the earned premium shall be computed on a pro-rata basis subject to any minimum retained premium rule.

COVERAGES - OTHER PROGRAMS -

It is permissible to attach any filed form offering supplemental coverage not included in this section. The appropriate rates are to be used.

INSURANCE BY MORE THAN ONE COMPANY – (SF-128)

When coverage is divided between two or more companies, this form designates the percentage of the total insurance provided by this policy. This policy will pay only that percentage of any covered loss, not to exceed the applicable amount of insurance shown in the Declarations.

INTERPOLATION -

To determine the premium/rate for an amount between two amounts shown in the manual, add the pro-rata factor for the difference between the nearest amounts shown to the factor for the lower amount.

MAXIMUM & MINIMUM CHARGES -

No additional premium shall be charged, and no return premium shall be allowed when such additional or return premium is less than \$5.00.

Minimum Premium (SF-1)	\$50
------------------------	------

Minimum Retained Premium	\$25
--------------------------	------

RATE REVISIONS -

After the Underwriters Rating Board announces a rate revision, each individual company choosing to adopt the revision, shall determine the effective date(s) for:

- 1) new policies, and
- 2) renewal policies.

RESTRICTION OF INDIVIDUAL POLICY -

If a policy would not be issued because of unusual exposures, the applicant may request a restriction of the policy at no reduction in the premium. The request, bearing the signature of the applicant, shall be referred to the Company.

TERRORISM RISK INSURANCE ACT -

The Terrorism Risk Insurance Act, as amended, is a program established by the federal government where the government will share the risk of loss from terrorism as specified in the Act. Insurers providing commercial insurance are required to make coverage available for certified acts of terrorism. Refer to the Company for the Company's procedure to comply with the Terrorism Risk Insurance Act.

WHOLE DOLLAR PREMIUM -

The premium for each exposure shall be rounded to the nearest dollar, separately for each coverage provided by the policy.

A premium involving 50 cents or over shall be rounded to the next higher dollar.

5. RATING:

All rates in this manual are ANNUAL per \$1,000 of Insurance unless otherwise specified.

All Building premiums are ANNUAL premiums shown at a \$200,000 amount of insurance.

All Business Property premiums are ANNUAL premiums shown at a \$100,000 amount of insurance.

All premium/rates shown are for 80% Coinsurance.

1. Determine the premium for **Coverage A and/or Coverage B.**

a. For each occupancy, use the Classification Tables to determine the Rate Group.

If there is more than one Mercantile, Non-Manufacturing, Warehouses & Yards or Manufacturing occupancy within the building fire division, the highest rated classification applies to the entire building and business property within that building fire division.

A building with multiple occupancies and fire divisions which extend from the lowest level (including the basement) to the roof and are of concrete block or other fire resistive material shall be classified using only the occupancies within that fire division.

When occupancy contains only offices and apartments, see Habitational Classifications.

b. For each Coverage (Building and/or Business Property), determine the **SF-1 Premium.** (The SF-1 premiums include Fire, EC & Vandalism.)

1) Determine the appropriate SF-1 Premium Page(s) using Zone and Coverage.

2) Obtain the SF-1 Premium using Rate Group and Protection.

The Building SF-1 Premiums are shown at a \$200,000 amount of insurance.
The Business Property SF-1 premiums are shown at a \$100,000 amount of insurance.

3) Apply the Building or Business Property Amount Factor. (See Amount Tables.)

If the applicable amount of insurance is not shown, use interpolation to determine the appropriate amount factor.

If the applicable amount of insurance is not over \$1 million, go to step 4).

If the applicable amount of insurance is over \$1 million:

a) Use the factor for \$1 million to calculate the SF-1 premium for \$1 million.

b) Obtain the applicable Over \$1 Million SF-1 Rate based on Coverage, Zone, Rate Group and Protection. (See Over \$1 Million Tables.)

c) Multiply by the amount of insurance (per \$1,000) for the amount above \$1 million).

d) Add this amount to the premium for \$1 million premium.

4) The SF-1 premiums are for frame construction.

If the risk is masonry, apply the applicable masonry factor. (See the SF-1

Premium Page used in step 1) above).

- 5) The SF-1 premiums are for risks constructed prior to 1/60.
If the risk is constructed since 1/60, apply the applicable since factor. (See the SF-1 Premium Page used in step 1) above).
- 6) If applicable, apply the SF-5 or SF-6 Factor.
(See SF-5 and SF-6 Table.)
- 7) Apply the Classification Factor. (See Classification Tables.)
- 8) Apply the Zone Factor. (See Zone Tables.)
- 9) Apply the Coinsurance Factor. (See Coinsurance Tables.)
- 10) Apply any applicable Special Conditions Factors.
(See Special Conditions Tables.)
- 11) Apply the Deductible Factor.
- 12) If the policy is an SMP, apply the applicable SMP factor.

- c. If applicable, determine the **SF-2 Premium** for each coverage (Building and/or Business Property).
 - 1) Refer to the SF-2 and SF-3 Premium Page.
 - 2) Obtain the SF-2 Premium using Rate Group and Coverage.
The Building SF-2 premiums are shown at a \$200,000 amount of insurance.
The Business Property SF-2 premiums are shown at a \$100,000 amount of insurance.
 - 3) Apply the Building or Business Property Amount Factor. (See Amount Tables.)
If the applicable amount of insurance is not shown, use interpolation to determine the appropriate amount factor.
If the applicable amount of insurance is not over \$1 million, go to step 4).
If the applicable amount of insurance is over \$1 million:
 - a) Use the factor for \$1 million to calculate the premium for \$1 million.
 - b) Obtain the applicable Over \$1 Million SF-2 Rate based on Coverage.
(See Over \$1 Million Tables.)
 - c) Multiply by the amount of insurance (per \$1,000) for the amount above \$1 million).
 - d) Add this amount to the premium for \$1 million premium.
 - 4) Apply the Classification Factor. (See Classification Tables.)
 - 5) Apply the Zone Factor. (See Zone Tables.)
 - 6) Apply the Coinsurance Factor. (See Coinsurance Table.)
 - 7) Apply the Deductible Factor.
 - 8) If the policy is an SMP, apply the applicable SMP factor.

d. If applicable, determine the **SF-3 Premium** for Buildings.

1) Refer to the SF-2 and SF-3 Premium Page.

2) Obtain the SF-3 Premium using Rate Group and Coverage.

The Building SF-3 premiums are shown at a \$200,000 amount of insurance.

3) Apply the Building Amount Factor. (See Amount Tables.)

If the applicable amount of insurance is not shown, use interpolation to determine the appropriate amount factor.

If the applicable amount of insurance is not over \$1 million, go to step 4).

If the applicable amount of insurance is over \$1 million:

a) Use the factor for \$1 million to calculate the premium for \$1 million.

b) Obtain the applicable Over \$1 Million SF-3 Rate.
(See Over \$1 Million Tables.)

c) Multiply by the amount of insurance (per \$1,000) for the amount above \$1 million).

d) Add this amount to the premium for \$1 million premium.

4) Apply the Classification Factor. (See Classification Tables.)

5) Apply the Zone Factor. (See Zone Tables.)

6) Apply the Coinsurance Factor. (See Coinsurance Table.)

7) Apply the Deductible Factor.

8) If the policy is an SMP, apply the applicable SMP factor.

Note: The SF-3 provides coverage for Sprinkler Leakage to the building. Additional rating applies. Refer to Sprinkler Leakage in the Optional Property Section.

e. If applicable, determine the **SF-4 or SF-4A Premium** for Business Property.

1) Refer to the Optional Coverages for the rating for SF-4 or SF-4A.

Note: The SF-4 and SF-4A provide coverage for Sprinkler Leakage to the business property. Additional rating applies. Refer to Sprinkler Leakage in the Optional Property Section.

2. Calculate premiums for any optional coverages.

(Apply deductible factor, if applicable.)

(Apply SMP factor, if applicable.)

3. Add premiums for Building, Business Property and optional coverages.

4. Apply Premium Size Factor. (See Premium Size Factor Table).

5. If applicable, apply Individual Risk Premium Modification Plan (IRPM).
